Kahr Ultra-Compact Double Action Only Handguns

Kahr Barrel

The Kahr barrel begins its transformation from a solid round billet of high tensile strength proprietary steel, 3 inches in diameter and 30 inches long. In the temperature-controlled environment of the Lothar Walther factory, the barrel stock is gun drilled and rifled to match grade tolerances.

Kahr's Patented Offset Barrel

At the Kahr factory, the barrel stock is precisely cut to length and CNC machined. Nearly 75% of the solid steel billet is machined away to produce a single Kahr barrel. This intensive production method, providing the greatest material integrity and tightest tolerances, was chosen to assure the best quality barrel possible.

Kahr Slide

Also precision computer machined, the Kahr slide is made from 416 Stainless Steel bar stock. This component is heat-treated and tempered to optimize durability.

The combination of the engineering design, quality materials, and precise manufacturing results in the slide's toughness and compact size. Kahr's slide is the slimmest design among the major pistol brands.

Kahr Slide Stop Pin

Kahr Arms, a revolutionary company committed to quality, went to the extreme in researching the material for the slide stop pin. After exhaustively surveying and testing numerous unique steel alloys, a proprietary steel with unmatched toughness and elongation characteristics was selected. The material is so tough that, in order to manufacture the part, grinding operations have to be employed.

Although the material and the manufacturing process greatly increase the cost of the part, we feel that the resulting performance benefits vastly outweigh the expense incurred each time a Kahr pistol is assembled. This is just another example of Kahr's commitment to provide you with quality, unmatched at any price.

Kahr Magazine

The Kahr magazine tube is constructed of corrosive resistant 400 series Stainless Steel and heat treated to 50 Rockwell for durability. Plasma-welding the stamping to form the magazine tube gives a smooth interior surface for the "ammunition stack" to rise and feed, and creates an "unbreakable" seam. Furthermore, tumbling the magazine in the finishing process provides a smooth, consistent burr-free surface. There are no sharp edges on which to cut yourself.

Shown cut out magazine

Another feature, unique to Kahr magazines, is the steel slide stop pin contact insert in the magazine follower. This innovative insert assures that the follower will reliably engage the slide stop lever and lock the slide, magazine after magazine. With this feature, you do not have to be concerned with the inevitable wear that accompanies most plastic followers.

Unique Design

Seven U.S. Patents cover Kahr's unique locking, firing, and extraction systems. The incomparable cocking cam trigger system employs a cam to both unlock the passive safety and complete cocking and releasing of the firing pin. The system provides a "safe cam action" and unbelievably smooth double action only trigger stroke, fast to fire in critical defensive situations. These innovations, found only in the Kahr pistol, give the Kahr shooter an advantage in self defense, home protection and duty or off duty use.

Kahr Safe Cam Action

Extensive Testing

The development of the Kahr handgun involved numerous testing sessions during which 10,000 rounds of ammunition were fired through a single Kahr pistol. Each Kahr model has been extensively tested to assure the reliability, function, accuracy and safety of each component and of the final product.

As a result, Kahr has produced the most reliable compact fire-arm in the world today. We, at Kahr, have total confidence in the durability and long-term reliability of our Kahr pistols.

The Final Product - Big Gun Performance in a Small Gun Package

The Kahr design is original, creating the smallest package possible in four defensive calibers - 9 mm, .40 S&W, .45 ACP and the new .380 ACP.

The union of advanced design, quality materials and proper construction makes Kahr the smallest, thinnest, most reliable full power compact pistol.

Reliability. Unless the gun is 100% reliable, all else is meaningless. Kahr pistols have proven their reliability in testing by Federal, State and local agencies.

Size. Ergonomically, the Kahr compact pistol excels. The gun is easy to shoot well, and comfortable to carry for extended periods due to its thin profile.

Power. Despite their diminutive size, Kahr pistols deliver full size ballistic performance.

KAHR ARMS, KAHR, K9, K40, MK9, MK40, P9, P40, P45, PM9, PM40, PM45, P380, CW9, CW40, CW45 are the registered trademarks of Kahr Arms and may not be used without permission.

The Kahr Pistol is covered by U.S. Patents:

#5,359,799; #5,412,894; #5,415,075; #5,502,914; #5,678,340; #5,794,373; #6,401,379

N: Tritium Night Sights

NOVAK: Novak® Low Profile Tritium Night Sights

Comparison: CW Series vs P Series

The main differences are that the CW Series has conventional rifling, instead of match grade polygonal rifling; the CW Series has a MIM (metal-injection-molded) slide stop lever, instead of a machined slide stop lever; the CW Series slide has fewer machining operations; and the CW Series has simple engraving on the slide instead of rollmarking; and the CW Series is shipped with one magazine instead of two.

NOVAK® Night Sight (Rear)

For over 25 years, the name NOVAK® has been associated with the very best in custom pistolsmithing. The NOVAK® system is on the pistols used by the elite FBI HRT and SWAT teams, as well as the Texas Rangers. NOVAK® sights are the world's standard of excellence.

STEEL FRAME MODEL, 4.0" BARREL

Kahr Arms TP & T Series offers a full size carry gun with a thin profile in both steel and polymer frames. Featuring a Lothar Walther 4" match grade polygonal rifled barrel and silky smooth DAO trigger, this series provides an excellent "balance-in-hand" gun.

Kahr's unique design provides you with a simple point and shoot operation available in 9mm, .40 S&W and .45 ACP. This model has been described as a "good feeling carry gun".

STEEL FRAME MODEL, 3.5" BARREL

The K Series steel 9mm was the first design rolled out of the factory in 1995, and the line of concealed carry handguns has continued to grow ever since. The P & K Series have proven themselves as being the best concealed carry / back-up gun on the market by offering high quality and total reliability in a compact thin package.

Other features include a Lothar Walther 3.5" polygonal rifled match grade barrel, smooth DAO trigger, stainless or blackened stainless slide and an option for night sights. This compact size Kahr, available in 9mm, .40 S&W, .45 ACP and .380 ACP, offers excellent balance in the hand.

Visit your local firearms dealer today and feel for yourself.

CW9093: Matte Stainless Slide

CW Series are shipped with one magazine

The Kahr CW Series has the combination of features that makes it the best Concealed Carry Pistol in the market. It has the ideal combination of stopping power and shooting comfort, and is smaller, thinner and lighter than competitive brands. The CW Series' natural point of aim and low-felt recoil make them the ideal guns to shoot and carry.

With the introduction of innovative manufacturing processes in the production of the CW Series, the Kahr pistol represents an unrivaled value.

KAHR CUSTOM SHOP

featuring the Kahr PM9 Black Rose Edition®

PM9 BLACK ROSE EDITION®

Presentation Grade Slide

Purchasing the Kahr PM9 Black Rose entitles you to purchase a second, complete Kahr PM9 "Presentation Grade" slide, personalized with your name engraved on the right-hand side of the slide. (below)

Custom PM9 Scroll Marked Slide

Intricate scroll mark engraving on top and both sides of slide. Comes with standard sights installed. Fits new style PM9 only. Slide and sights only, call 508-795-3919 for pricing on slide internals.

For any questions or to request any of these services please contact Kahr Customer Service at 508-795-3919 or visit www.kahr.com. Prices subject to change without notice.

Kahr Sight Installation Service

Installation of sights performed by a factory technician.
\$40.00 plus the cost of sights. + S&H (\$25.00)

K9 Elite Trigger Upgrade

The Elite trigger upgrade for the K9 pistol includes the installation of an Elite trigger system performed by a factory technician. The Elite trigger shortens trigger pull. The Elite trigger system includes a highly polished trigger. Firearm will be tested for functionality. All parts are included in price. Not available in some states and cities.
\$125.00 (includes cost of parts) + S&H (\$25.00)

Kahr Pistol Polish Package

The polish package is a full polish of feed ramps, slide stop lever, and barrel hood. The polish package improves the comfort and cosmetics of your Kahr pistol.
\$65.00 + S&H (\$25.00)

Kahr Pistol Polish Package Deluxe

Contains all attributes of Polish Package but includes polishing of stainless steel slides.
\$130.00 + S&H (\$25.00)

Kahr Pistol Refinish Package

The refinish package removes imperfections that may appear on the finish of the Kahr pistol over time. Glass beading all metal components (e.g. slide, frame) to remove light scratches and discoloration.
\$160.00 + S&H (\$25.00)

Kahr Pistol Factory Tune-up Service Package

The factory service package is an overhaul and tune-up of your Kahr pistol. This includes a complete cleaning and inspection of the pistol. All worn parts will be replaced. At a minimum the following parts will be replaced, recoil spring guide assembly, striker spring, trigger bar spring, and slide stop spring. We also polish the feed ramp and replace the extractor for smoother operation. Firearm will be tested for functionality. All parts are included in price.

Kahr parts to be replaced include:

Recoil Spring	Extractor	Guide Rod Assy
Trigger Bar Spring	Striker Spring	Slide Stop Spring
Total package price is \$175.00 + S&H (\$25.00)		

Kahr Pistol Update Service (P & PM Series firearms)

Bring your older Kahr pistol up to date. This update service modifies older revision frames to accept new revision barrel & recoil assembly. This modification also allows you to use ported barrels in your Kahr pistol. New revision barrel and recoil spring & guide rod assembly included in price.
\$190.00 + S&H (\$25.00)

Black Oxide Refinish Service - Carbon Steel parts only

Re-coating steel parts that originally had a black oxide finish.
Tommy Gun receiver assembly (lower, upper, barrel) \$150.00 + S&H (\$25.00)
MK Series slide \$75.00 + S&H (\$25.00)
K Series & Auto-Ordnance 1911's frame & slide \$125.00 + S&H (\$25.00)

Note: Services are only for firearms made by Kahr Arms and Auto Ordnance (Worcester, MA). Other non-warranty service will be billed at \$65/hour + cost of parts + \$25 S&H. There is a minimum \$65 charge.

PM9

with External Safety and LCI (loaded chamber indicator)

Models:
PM9193
PM9193N (Night sights)

Approved for
sale in MA

External Safety

This model has, in addition to the internal safety, an external safety that will prevent the firearm from firing when the safety is in the safe position. The product has an external lever with two settings. When the lever is pushed completely up and the red dot is fully visible, the firearm is in the armed position and ready to fire with the pull of the trigger.

When the lever is pushed down, and the red dot is hidden the firearm is in the safe position and will not function with the pull of the trigger. The safety works in the following manner. When the lever is in the down (Safe) position the connecting cam on the lever pushes the trigger bar out of position, disconnecting it from the cocking lever. If the trigger is pulled in the safe mode, the cocking cam will not release the striker and the firearm will not fire. When the lever is pushed up (Fire/Armed position) the cam moves out of place and the trigger bar moves up, again connecting with the cocking cam. The firearm is then ready to fire with the pull of the trigger.

Fire Mode

Safe Mode

Loaded Chamber Indicator

This model is designed to provide physical indication if there is a bullet loaded in the chamber. The product is designed with a lever mounted on the top of the slide. The lever is marked as Indicator in red lettering. When a bullet is chambered it pushes the lever upward and out of position. The operator will visually see the lever as it is raised up. Also the operator will be able to feel the indicator as being out of its normal resting position as it will not be flush with the top of the slide, thus warning the operator that the firearm is loaded.

Empty Chamber

Loaded Chamber

PM SERIES

with Crimson Trace® Laser Sight

Models:
PM9093L
PM4043L

Only available in matte stainless slide
with standard sights

This PM9/PM40 comes with the Crimson Trace® Laserguard (LG-437). The Laserguard design is the most compact, instinctively activated, user-adjustable laser sighting system on the market today.

The Model LG-437 uses either two #357 silver oxide batteries or a single 1/3N 3 volt lithium battery. These small batteries allow the Laserguard to be unobtrusive yet powerful enough to provide the brightness that Crimson Trace® is known for. Another feature of the LG-437 is that it uses the smaller 3.3mm diameter laser diode which reduces the overall size of the laser diode housing. As with all other Crimson Trace® products, the LG-437 has both windage and elevation adjustments for shooters to adjust the laser for a perfect hit at any distance. All Laserguards come with an accessory pack that contains batteries, hex wrenches for laser adjustments and several cleaning swabs.

Laserguards are made in the United States of America. Crimson Trace is the world's only manufacturer of grip-integrated laser sighting systems. Police, all branches of the U.S. Military, and responsible citizens worldwide use patented Crimson Trace® products.

P380

Models:
KP3833
KP3833N (Night sights)
KP3834
KP3834N (Night sights)

The Kahr P380 slide is machined from solid 416 stainless bar stock and locks back on the last round. The standard sights are bar-dot and are dovetailed into the slide. The barrel is a premium Lothar Walther match grade polygonal rifled design which allows higher muzzle velocities for hollow point ammo than conventional rifled barrels. Two stainless steel six round magazines are shipped with each gun.

"Still, this is by far the most consistently accurate 'mini' .380 I've shot yet."

By Massad Ayoob (Guns Magazine, Aug. 2009)

"If you've ever left home unarmed because your carry gun was just too big and/or heavy, the Kahr P380 may be just the gun you need."

By Mike Detty (Combat Handguns, Sep. 2009)
